- Clean Air monitoring  
We put up the Clean Air Monitoring tubes from Friends of the Earth. One is positioned by the Reception Gate and the other is on Paxton Playground adjacent to the main road. This should give us contrasting results. The tubes will be in position for 2 weeks. It is important that no-one touches the tubes. We will take the tubes down on Monday 11<sup>th</sup> at our next meeting. In the future the school council would like to hold an assembly talking about how we can impact the air around us.
- Playground Markings  
Since the resurfacing of the main playground we have the opportunity to redesign markings. Please make time to allow your school councillor to ask your class to draw different designs for playground markings (not swings and slides!). We will look at these together in our next meeting and decide what to do next.
- WE day  
Next Wednesday, 6<sup>th</sup> March, I am taking the KS2 School Council to WE day in Wembley. This is a celebration of the work that they have been doing. They will hear inspirational speakers and performers. It sounds like it will be amazing. I discussed arrangements for the day with the children. Please pass any reply slips to the office.

The next meeting will be on Monday 11<sup>th</sup> March at 2.15 in Saffron Class. I will collect children in the main school. Please can Paxton children come over themselves to meet us.
