

## Kelvin Grove Year 3 Home Learning – Spring 2 2025

For this term, your home learning projects are to support your knowledge of Rocks, Earthquakes and Volcanoes. Below are suggested activities and we would like to EVERYONE to complete at least **one** of them by the end of the term. Please hand them in from Monday 24<sup>th</sup> March (week 5) we have time to enjoy your work. We would like you to enjoy getting creative and we are looking forward to seeing what you produce!

Create a board game inspired by volcanoes.

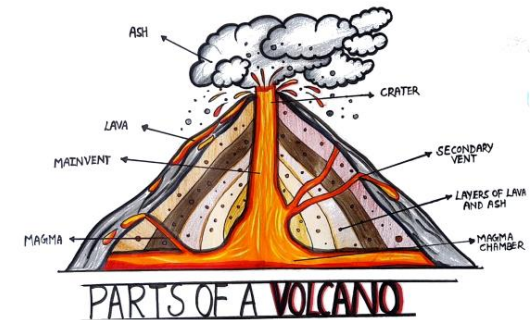

Write a fact file about how Earthquakes happen.

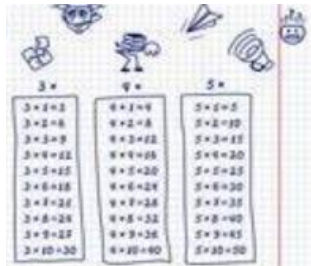

Can you draw or make a volcano and label the different parts?

(E.g., crater, magma, lava, vents, magma chamber, fumarole)

Choose a times table to practice. The 4x table? The 8 x table? Make a poster to stick up to help you, or your own memory deck to use at home.

Can you write an acrostic poem about your learning? On volcanoes, earthquakes or fossils? For example:

**V**esuvius, the famously erupted  
**O**range, red and yellow magma bubbling into  
**L**ava, burning a path into the  
 City Pompeii below  
**C**...  
 (What word do you think this will be?)

Create your own fossil out of paper, playdough, anything at all!
